

Here at the bottom right there are the page figures, we must see that 30 topics per page and that if there are more the page figures are added. You see where Display posts from previous is written, you have to do so for the function to sort the topics to work. By author, sort direction

The topics must be as in the image above, on the left there is the avatar of the creator of the topic on the left of the last one who wrote

for when I create forum and categories look like this for I can add picture in left, for in right have avatar of last who have write in this forum category.

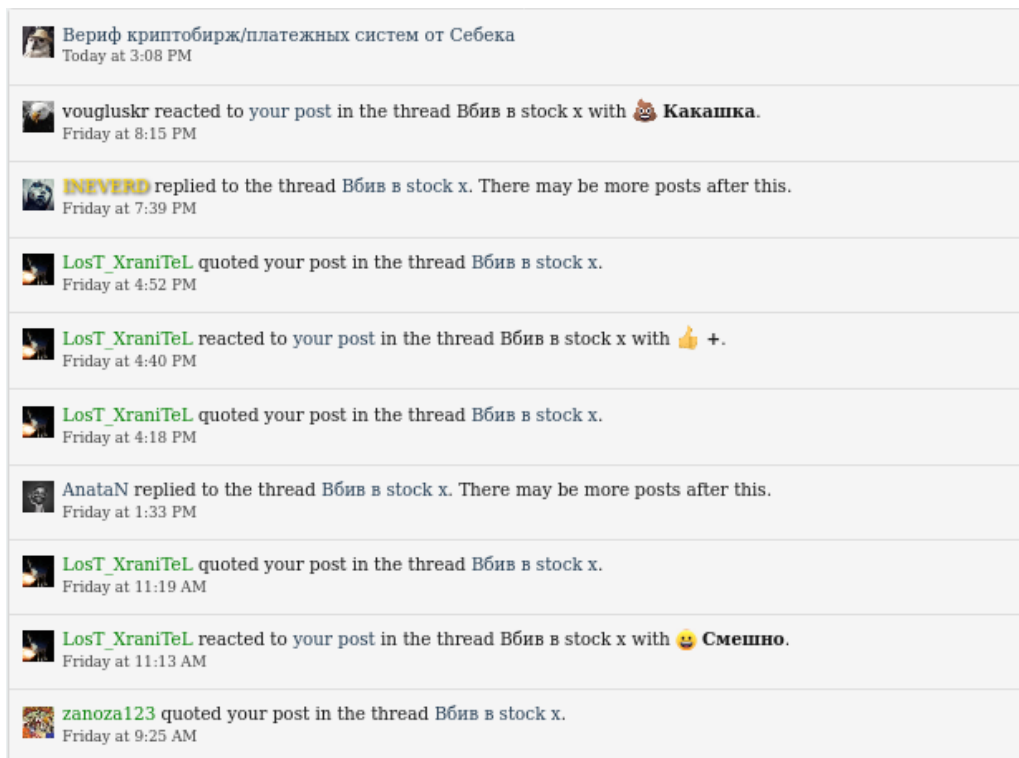

This when writing in topic look like this and need for can reply in message.

When someone answer in message topic look like this.

It is necessary to add a notification system so that the users receive a notification at the bell as in the image and when they click on the bell they see the last notifications and that there is show all when you click on show all the we see that

show all message where have writing in topic

need for write topic have like this

In the admin panel create a topic space, we must see all the topics created and that I can delete or close them (so that no one can answer).I started the second project, but I'm going to work on it a bit there too.

the colors as I did leave them, the images I put in the file are so that you can see what the customer requested and please make a clean code (in laravel not just php, because there are functions in laravel already ready, like for notifications for example) <https://laravel.com/docs/8.x/notifications>
